ATSO Machine

Photos by Airman 1st Class Shannon Kluge, 8th CS, VI

New members of the 8th Fighter Wing go through the ability to survive and operate “machine” July 11 at the base track. The ATSO machine is designed to teach the procedures identified in the Airman’s Guide and base ATSO guide. Some items discussed were chemical warfare decontamination, unexploded ordnance identification and sign counter-sign procedures. Above: Senior Airman Kevin Palmer, 8th Transportation Squadron, (right) instructs Senior Airmen Eric Rice, 8th Maintenance Squadron, (left) and Richard Hutchison, 8th MXS, (center) on the proper procedure for doffing a contaminated gas mask. Above left: Staff Sgt. Chad Kutcher, 8th MXS, (right) removes his buddy’s, Tech. Sgt. George Booker, 8th MXS, rubber boot while Staff Sgt. Mark Iriate, 8th MXS, observes. Right: Staff Sgt. Daniel Miller, 8th MXS simulates washing his gloves in bleach and water.
